## CLUBSPORT 2

The Mastersteel Clubsport 2 is the ideal car tyre for the smaller family car. With its special tread construction, you are guaranteed optimum roadholding and a shortened braking distance. The 4 wide longitudinal grooves ensure good drainage of water and dirt.

The Mastersteel Clubsport 2 guarantees excellent performance on both dry and wet roads.

Available sizes: 13" to 15"

## PROSPORT 2

The Mastersteel Prosport 2 is a tyre specially developed for larger and heavier mid-range cars. The tread construction with the 4 longitudinal grooves, combined with the thoughtfully placed width grooves, ensures that driving performance, even in extreme weather conditions, is maintained.

Even at higher speeds, during cornering and sudden swerve, the Mastersteel Prosport 2 continues to perform reliably. A safe idea!

Available sizes: 14" to 16"

## SUPERSPORT 2

The Supersport 2 has been specially developed for larger mid-range cars, cars in the more luxurious premium segment and the sporty class. This high-performance tyre gives you maximum control over the power and speed delivered.

The Mastersteel Supersport 2 guarantees reliable driving and braking characteristics and optimum driving comfort. As a result, even during extreme manoeuvres, the car remains easily steerable and under control. Even on wet road surfaces!

Available sizes: 17" to 20"

## MCT3

With a greatly increased load capacity, the MCT3 is suitable for heavy loads. The MCT3 is based on a reinforced tyre construction (carcass) that allows for heavy loads. The rubber compound is adapted to the heavier use. Despite the robust construction, the tyre feels comfortable and the trailer remains steerable, even under maximum load. The MCT3 provides optimal grip.

Available sizes: 14" to 16"

## LIGHTTRUCK

With an extra high load capacity, the Light Truck has been specially developed for the heavier work.

The Light Truck has a special rubber compound, a reinforced tire construction (carcass) and a balanced profile. This guarantees optimum performance, even under maximum load. The Light truck meets the high requirements of transport and vans.

## ALL WEATHER VAN 2

The Mastersteel All Weather Van 2 is a specially designed tyre for transport and delivery vehicles to perform in changing weather conditions, without tyre changes, all year round. The tread design provides increased grip and handling even in wet and winter conditions. The tyre has a higher load capacity and maintains its good performance even at higher speeds.

Available sizes: 15" to 17"

## ALL WEATHER 2

The Mastersteel All Weather 2 has been specially developed to perform optimally in all seasons and conditions. With its tread design and high-tech rubber compound, this tyre performs excellently in all seasons and provides good grip and safe handling in all weather conditions. The efficient water and snow drainage ensures more control in wet and winter conditions.

The All-Weather 2 has the 3PMSF certification, making it compliant with European regulations for all-season and winter tyres.

Available sizes: 14" to 19"

## WINTER SUV+

## WINTER SUV+

The reinforced construction of the Winter SUV+ makes the tire more resistant to the heavier weight of the cars in this segment. The Winter SUV Plus remains flexible due to the special winter compound (rubber compound) and is therefore resistant to extreme winter conditions. Due to the efficient water and snow removal, there is more grip and control and the car remains steerable, so that driving and braking properties are retained. The tyre is equipped with the 3PMSF certification, which means that it meets the European regulations for all-season and winter tyres.

**Available sizes: 16" to 18"**

## WINTER VAN+

## WINTER VAN+

The Mastersteel Winter Van Plus is a winter tyre specially developed for transport and vans to perform optimally during severe winter conditions. Even with unexpected (evasive) maneuvers, the technically advanced product ensures more grip and a reliable steering response. Due to the efficient water and snow removal, the control remains optimal and the vehicle is easy to steer.

The tyre has 3PMSF certification and thus meets the European regulations for all-season and winter tyres.

**Available sizes: 15" to 16"**

## WINTER+

## WINTER+

The Winter Plus is an innovative, high-tech product and equipped with the 3PMSF certification, which means that it meets the European regulations for all-season and winter tyres. The Winter Plus is optimized for maximum performance in all winter conditions. Due to the efficient water and snow removal, there is more grip and control and the car remains easy to steer. Due to the special winter rubber compound, the tyre remains flexible even at extremely low temperatures, so that grip, driving and braking properties are retained.

**Available sizes: 13" to 18"**
